Fact Sheet
EU Deforestation Regulation Compliance

Version: July 2026

Regulation (EU) 2023/1115 | In force since 29 June 2023

Primary Objective	Minimise the EU's contribution to global deforestation and forest degradation by ensuring that certain commodities and their derived products placed on or exported from the EU market have not been produced on deforested or forest-degraded land after 31 December 2020
Legal Basis	Article 192(1) TFEU (Environmental policy)
Replaces	EU Timber Regulation (EUTR) – Regulation (EU) No 995/2010
Competent Authority	Each EU Member State designates a national competent authority responsible for checks and enforcement
Scope – Territories	All operators and traders placing products on the EU market OR exporting from it, regardless of country of origin of the commodity
Deforestation Cut-Off Date	31 December 2020 – land used for production must not have been deforested after this date

KEY DATES

Date	Milestone	Details / Notes	Applies To	Status
31 Dec 2020	Deforestation Cut-Off Date	Production of in-scope commodities must not have contributed to deforestation or forest degradation after this date.	All operators	Fixed / Permanent
29 Jun 2023	Regulation Published & In Force	EUDR published in the Official Journal of the EU	All parties	Confirmed
30 Dec 2025	NEW Compliance Deadline – Large Operators	After a 12-month postponement (Regulation (EU) 2023/1115), large operators and traders must comply by this date.	Large operators	Confirmed
30 Jun 2026	NEW Compliance Deadline – SMEs	SMEs and micro-enterprises have an additional 6 months beyond the large-operator deadline.	SMEs / Micro	Confirmed
May-25	Benchmarking System – Country Risk Lists. India marked as LOW RISK	The Commission publishes country risk classifications (standard, low, high risk) by delegated act.	All operators	⚠ Future Update

EUDR KEY OBLIGATIONS FOR OPERATORS & TRADERS

Obligation	Applies To	Description	Status
Due Diligence Statement (DDS)	Operators	Before placing products on EU market or exporting, operators must submit a DDS via the EU information system. DDS must confirm: (a) product is deforestation-free (b) produced in compliance with relevant legislation of country of production.	Current requirement
Deforestation-Free Verification	Operators	Operators must collect geolocation data (polygon or GPS coordinates) for all plots of land where commodities were produced, and verify no deforestation occurred after 31 Dec 2020.	Current requirement
Country Legislation Compliance	Operators	Products must be produced in compliance with applicable local laws.	Current requirement
Supply Chain Traceability	Operators	Operators must be able to trace commodities back to the plot of land of production and maintain records for a minimum of 5 years.	Current requirement
Risk Assessment	Operators	Operators must assess and classify supply chain risk as 'negligible', 'low', or 'non-negligible' using all available information. Only 'negligible' risk products may be placed on market.	Not currently required for products from India since it LOW-RISK classified
Risk Mitigation Measures	Operators	Where risk is identified as non-negligible, operators must implement mitigation measures (e.g. further audits, third-party verification, capacity building with suppliers) before placing on market.	Not currently required in India since it LOW-RISK classified
Record Keeping (5 Years)	Operators & Traders	All documentation, geolocation data, risk assessments and DDS references must be kept for a minimum of 5 years and made available to competent authorities on request.	Current requirement
Simplified Due Diligence	Traders (non-SME)	Traders who are not SMEs must exercise due diligence but may reference existing DDS from operators in the supply chain.	Current requirement
SME Trader Reference Regime	SME Traders	SME traders only need to collect and keep information on the DDS reference number, supplier name, and customer info. Simplified information obligation.	Current requirement
EU Information System	Operators	Commission established an information system through which DDS must be filed and reference numbers generated. System interoperability with TRACES and customs.	⚠ System details subject to update
Country Benchmarking Adjustment	All	Once country risk benchmarking is published, operators from 'low risk' countries benefit from simplified due diligence. 'High risk' country sourcing triggers enhanced checks by competent authorities.	⚠ Possible Future Update

EUDR COUNTRY BENCHMARKING SYSTEM

Risk Category	Due Diligence Requirements	Inspection Rate
Standard Risk	Full due diligence and DDS required. Risk assessment, geolocation data, documentation.	3%

Low Risk	Sourcing from low-risk countries entails simplified due diligence obligations for operators and traders. This means that they need to collect information for due diligence purposes, but not assess and mitigate risks.	1%
High Risk	Enhanced due diligence required.	9%

GLOSSARY

Term	Definition
Operator	Any natural or legal person who, in the course of a commercial activity, places relevant products on the market or exports them from the EU.
Trader	Any person in the supply chain other than the operator who makes relevant products available on the market.
Placing on the Market	The first making available of a relevant product on the EU market, including online sales.
Making Available	Supply of a product for distribution, consumption or use on the EU market in the course of a commercial activity.
Due Diligence	The process by which operators collect information, assess risk, and implement mitigation measures to ensure products are deforestation-free and legally produced.
Due Diligence Statement (DDS)	The declaration filed by the operator via the EU information system prior to placing products on the market, confirming due diligence has been performed.
Deforestation	Conversion of forest to agricultural use, whether human-induced or not.
Forest Degradation	Structural changes to forest cover, including harvesting, through logging, conversion to planted forests or other human-induced means.
Forest	Land spanning more than 0.5 ha with trees higher than 5 m and a canopy cover of more than 10%, or trees able to reach these thresholds in situ (as defined in the FAO Global Forest Resources Assessment).
Geolocation Data	Geographical coordinates, in the form of latitude/longitude (GPS points) or polygon data, identifying the plots of land where commodities were produced.
Relevant Products	Products listed in Annex I of the EUDR that contain, have been fed with, or have been made using relevant commodities.
Relevant Commodities	The 7 primary commodities listed in Annex I: cattle, cocoa, coffee, palm oil, soya, wood, and rubber.
Country of Production	The country where the relevant commodity was produced, i.e. grown/raised.
Negligible Risk	The risk classification required for an operator to place a product on the market. Determined through risk assessment in the due diligence process.
Competent Authority	The national authority designated by each Member State to be responsible for the application of the Regulation, including checks and penalties.
SME	Small and medium-sized enterprise as defined in Commission Recommendation 2003/361/EC (fewer than 250 employees and annual turnover ≤ €50m or balance sheet ≤ €43m).
Benchmarking Country Risk	A classification system (low/standard/high risk) applied to countries by the Commission based on deforestation risk indicators; affects level of due diligence required.
